

YUSUF SANUSI

Abeokuta, Ogun State, Nigeria, +234 810-4864-908, | sanusikorede@gmail.com | www.linkedin.com/in/skyusuf15

PROFESSIONAL SUMMARY

A dedicated Senior Software Engineer with over 9 years of expertise in developing and deploying software, leveraging a wide range of languages, frameworks, databases, tools, and cloud services. Recognized for flexibility and proactive problem-solving abilities, this individual excels in critical thinking and collaboration within dynamic teams. Moreover, they demonstrate a strong aptitude for remote work, further enhancing their effectiveness in distributed environments.

SKILLS

NodeJS (NestJS), PHP (Laravel) & Python Development | API Development | Database Management (MySQL, MongoDB, Postgres) | Microservices | Monolithic | Software Development | Research & Development | Leadership | Cross-functional Collaboration | Docker | Kubernetes | AWS.

EXPERIENCE

Senior Backend Engineer

October 2024 – current

Autochek Africa | Lagos Nigeria (Hybrid)

Website: www.autochek.africa

Core Technologies: NestJS, PostgreSQL, GRPC, SonarQube, GCP, Notion, GitHub.

- Led performance optimization of microservices by identifying and resolving startup bottlenecks caused by excessive database migration files, reducing deployment time to ~3 minutes and significantly lowering memory usage.
- Designed and maintained scalable microservices using NestJS, handling complex business logic for loan processing, document workflows, and third-party integrations.
- Integrated external services (e.g., e-signature platforms EmSigner and orchestration tools Orkes) to automate document signing workflows, including webhook handling and secure document retrieval.
- Improved code quality using SonarQube and increased test coverage by writing unit tests for critical services, while refactoring large methods into modular, maintainable components.
- Co-led the planning and development of optimizations to the loan origination process, simplifying complex workflows and enabling faster loan disbursement for customers.

Full Stack Engineer (Backend Heavy) & Team Lead Software Engineer

February 2020 – May

Indicina | Lagos, Nigeria (REMOTE)

2024

Website: www.indicina.co

Core Technologies: Laravel, NestJs, Flasks, MySQL, MongoDB, OpenSearch, RabbitMQ, Redis, GRPC, Kubernetes, Docker, SonarCube, Prometheus, GitLab CI, AWS, Jira

- Led a team of 4 engineers to design and build an **open banking aggregator**, integrating with banks and other financial data providers to securely expose customer-permissioned financial data via APIs.
- Architected the system to support scalable, asynchronous data collection and delivery across multiple third-party clients.
- Achieved 97% document extraction accuracy using AWS Textract for credit scoring pipelines.

- Collaborated with stakeholders to design API standards compliant with global open banking practices.
- Received "Engineer of the Quarter" award (Q2 2022).

Software Engineer

October 2017 - January 2020

OT&T Consulting Limited | Lagos, Nigeria

Website: www.otandtconsulting.ng

Core Technologies: PHP, Laravel, JavaScript, jQuery, HTML5, Python, MySQL.

- Co-led the automation of the loan origination workflow (fasttrack) for **Primera Microfinance Bank (now Koins MFB)**, transitioning from a paper-based to a fully digital system.
- Built a web-based document management and loan approval platform using PHP and MySQL, significantly reducing turnaround time and manual errors.
- Developed and supported custom banking solutions tailored to regulatory and operational needs.

EDUCATION

Bachelor of Science (BSc) - Computer Science
Imo State University, Owerri, Imo State, Nigeria

August 2018

ADDITIONAL INFORMATION

Willing to relocate with minimal assistance.
